

Webinars

At Liles Parker, we believe it is important not only to provide the highest level of legal representation to our clients, but also to offer ongoing educational opportunities, webinars and events about current health and business law issues for our clients and friends of the firm.

A number of our attorneys regularly teach as part of the [Certified Medical Compliance Officer \(CMCO\)](#) course offered through [Practice Management Institute \(PMI\)](#), several times a year. PMI's Compliance Officer certification program is unique in many respects and the curriculum is updated throughout the year. Liles Parker attorneys are regularly asked to present at PMI webinars, conferences and panel discussions. Notably, members of our staff also work closely with [Decision Health](#), the [Medical Association of Billers](#), and the [American Health Lawyers Association](#).

Each month, our attorneys speak on health law and business law topics. Please see below for links to our Webinar schedules.
